

A Public / review-safe materials

Item	Status / access
Source code	Included in the accompanying review-safe package
Frozen protocols	Included in the accompanying review-safe package
Aggregate metrics and summary tables	Included in the accompanying review-safe package
Figure and table source data	Included in the accompanying review-safe package
Manifests and checksums	Included in the accompanying review-safe package
Supplementary audit summaries	Included in the accompanying review-safe package

Review-safe materials support figure/table reproduction and aggregate-result inspection.

B Restricted / not publicly redistributed

Item	Status / access
Raw held-out labels	Not publicly redistributed
Target-attributable held-out records	Not publicly redistributed
Score matrices	Not publicly redistributed
Model checkpoints	Not publicly redistributed
Restricted third-party source records	Not publicly redistributed
Controller-held materials	Not included in the public package

Third-party source records remain governed by their original licenses and access conditions.

C Reproducibility routes

Reproducibility task	Route
Reproduce tables / figures	Public aggregates + source plotting data
Re-run benchmark	Licensed sources + frozen protocols + scripts
Audit sealed test	Manifests / hashes; restricted review only if approved

Different reproducibility goals require different access routes; raw sealed-test materials are not included in the public package.

No raw held-out labels, score matrices, checkpoints, or controller-held materials are included in the public release package.
