

## A Score-construction audit

| Audit item                             | Status |
|----------------------------------------|--------|
| Validation labels used in NN scoring   | No     |
| Held-out labels applied before scoring | No     |
| Score-construction audit               | Passed |

No evidence of label use in score construction.

## B NN stress variants

Perfect-AUPR herbs

11 / 67

Single-compound validation herbs

Strong compound-profile similarity signal; results should be interpreted cautiously.  
Potential similarity-driven shortcut; this does not establish label leakage.

Validation-only similarity audit; no evidence of label use in score construction, but strong compound-profile similarity warrants cautious interpretation.
