

A Public v1.2 reproducibility assets

Item	Status / access
Fixed split and registries	Public; 535 / 67 / 67 herbs
Recorded-positive test labels	Public; 8,632 pairs
Candidate target universe	Public; 2,309 targets
Frozen graph snapshot	Public; package-contained
Best checkpoints	Public; 25 frozen weights
Score matrices and metrics	Public; 25 matrices + scripts

All assets needed for fixed-test re-evaluation are included in this release.

B External source and licence boundaries

Item	Status / access
Dryad source tables	Fetch from Dryad v6 (DOI recorded)
ChEMBL source records	Fetch from provider; attribution retained
HGNC / UniProt / STRING records	Fetch from original providers
Provider credentials or private accounts	Not included
Historical sealed-access controls	Not active in v1.2

Raw provider records are linked and attributed rather than mirrored indiscriminately.

C Independent evaluation route

Item	Status / access
Verify package integrity	Run checksum verifier
Reproduce frozen scores	Run public checkpoint scorer
Evaluate any compatible model	Submit NPZ with fixed axes
Inspect raw logits / labels	Load public matrices and label CSV
Model selection	Not permitted after public-test release

The fixed test set is public in v1.2; it is not a continuing sealed test.
